

Instructions

- 1) Print pages 2-5 on letter-sized paper in landscape mode.
- 2) Line up the sheets, overlapping, to form the image on this page.
- 3) Paste onto cardboard or foam core board, cutting away excess paper leaving only the circle.
- 4) Poke a hole in the center of the spiral and stick a pencil through it. For a more durable spinner, get creative. I used K'Nex toy parts to create an axel that keeps the spinner in place.
